

# Performance Up! Your Operations with Digital Tools

*Performance Up! & Digital Talk  
– LOGIMAT 25*

*We believe that combining our core capabilities as ONE service to our customer and managing this service holistically will prepare our customer for successful transformation OR saves failing go-lives.*

Our interdisciplinary and experienced teams manage the ramp-up processes and stabilize in crisis situations to ensure your performance in supply chain operations.

*Transformation  
Management  
Modules*

*Operations  
Excellence*

Uncover weaknesses and getting back on the fast track to ensure a performant operation.

*Ramp-up  
plus*

Unleash your ramp-up potential. Let us be your partner to help you get going in your new warehouse.

*Outsourcing  
Excellence*

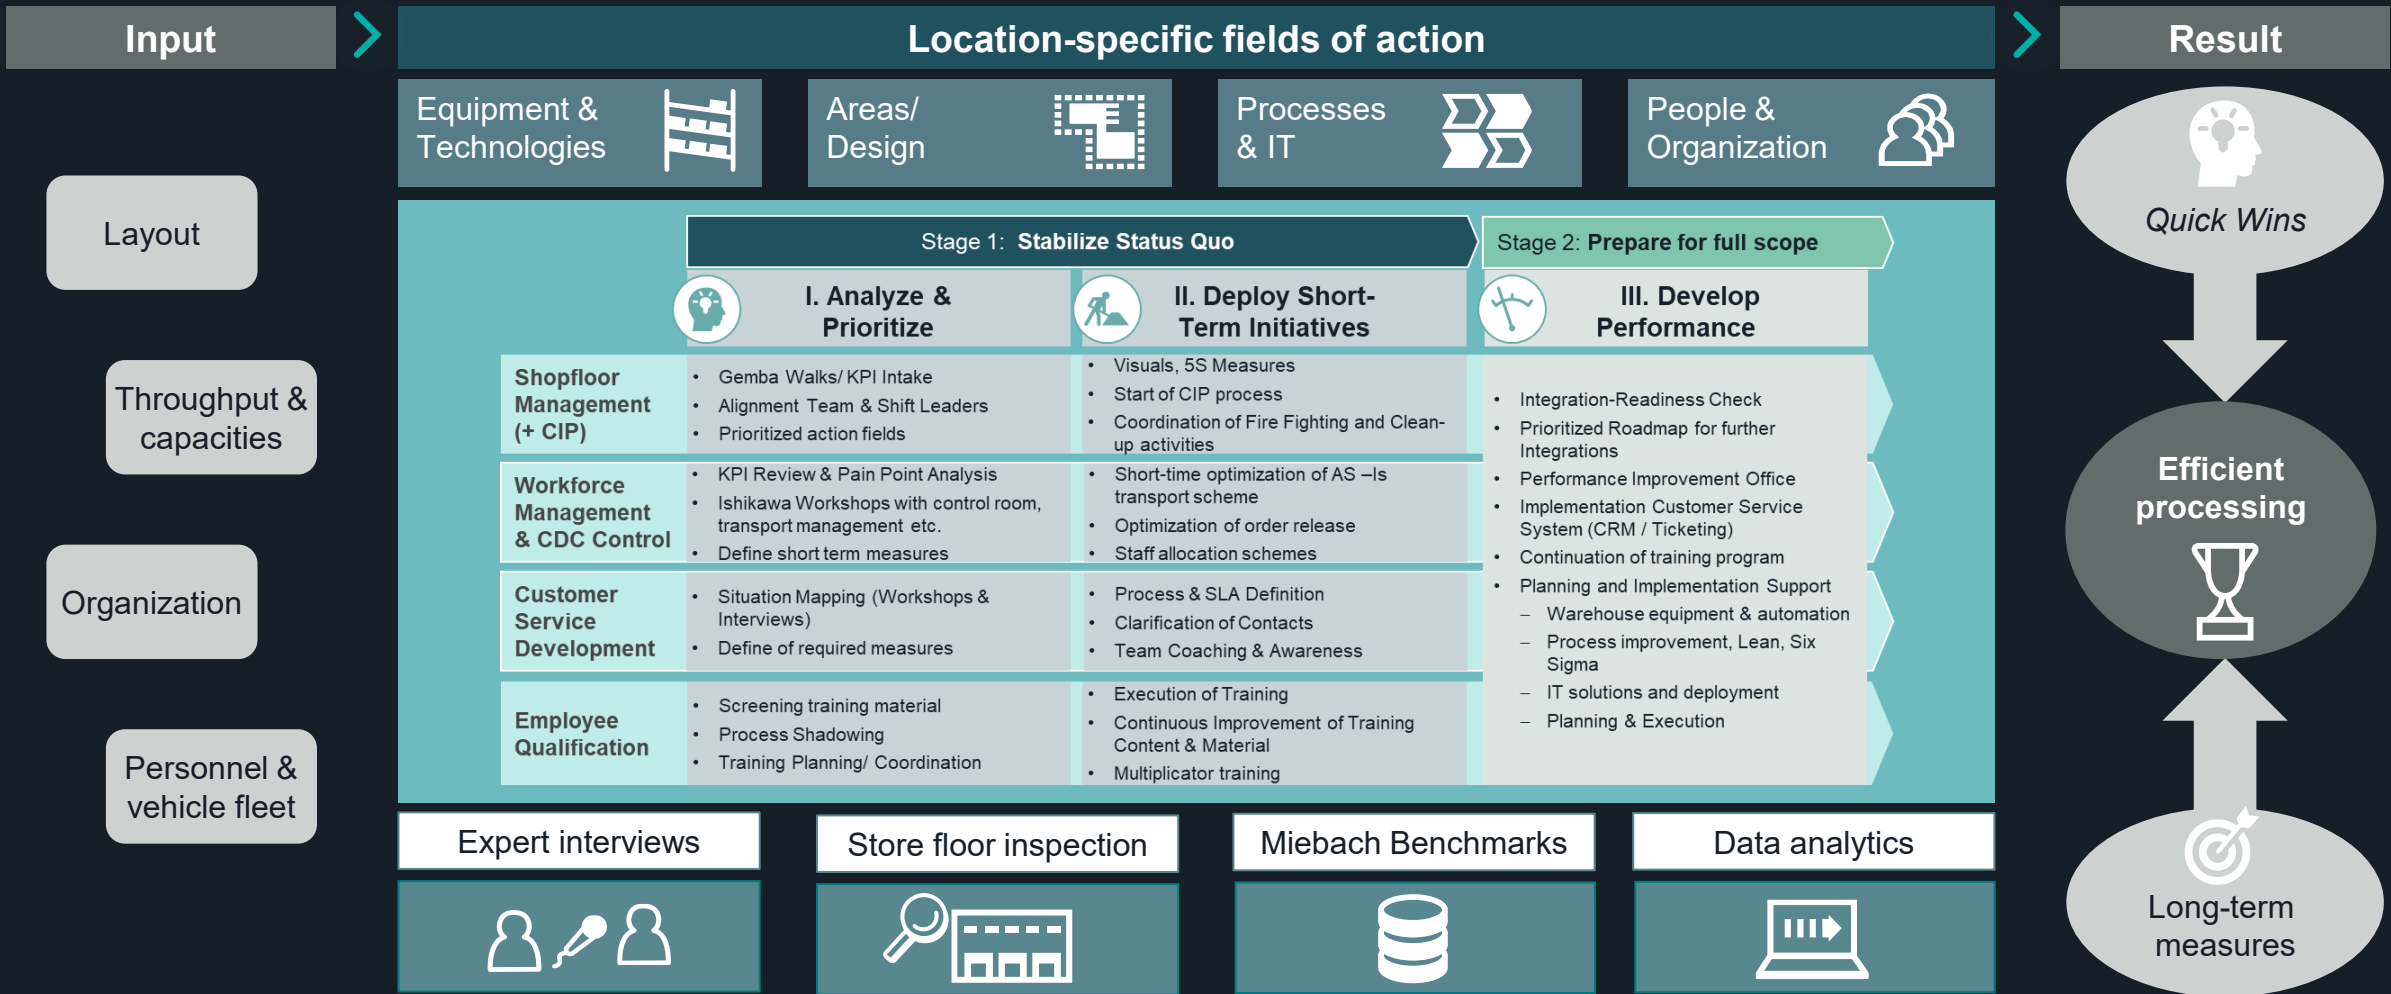

Balancing costs and service is a challenge that needs to be faced. Let us help you find the right answer and get the transformation started.

*Project Excellence*

Together we will find solutions to transform your supply chain into the future.

# Rapid identification of target-oriented fields of action to increase performance through holistic task force deployment

# Task force-driven implementation of the Performance Up! program leads to the rapid stabilization of warehouse performance

**Performance of warehouse:** Short-term stabilization and increase in performance, reduction in internal warehouse throughput time end-to-end, increase in number of processed parts per time unit, increase in outbound delivery reliability

**Shopfloor Management (+ CIP):** Introduction of shop floor meetings/ board, implementation of error reports and 5S, improved material flow, redesign of workstations, shortening of run and delivery times (layout optimization)

**Personnel management & CDC control:** Reduction of overstaffing, optimal personnel planning, productivity reports, improved inbound transparency and outbound QA

**Customer service development:** introduction of additional CS employees, increase in management attention, packages of measures for proactive customer care

**Employee qualification:** training implementation, installation of CIP employees, availability of process/ training documents, visibility of store floor leads

## Optimization potential

(Miebach experience values)

**Internal ware-  
house lead time**

~ - 15 to 35%

**Optimized  
personnel  
deployment**

**Increased  
customer  
satisfaction**

**Delivery  
reliability**

~ + 20 to 30%

**Throughput  
quantity**

~ +25 to 40%

*You can only optimize,....*

*...what you can measure.*

# In warehouse operations, gaps between essential performance drivers are critical when operating in an ever-changing environment

*What are the reasons for not reaching performance targets?*

# Our Miebach team of experts see warehouse operations holistically – this is the way to ensure uncompromising warehouse performance
